TRAINING ACADEMY

Overhead Crane Operator

Overview

This program will provide students with an in-depth knowledge of lifting, rigging, and overhead cranes, to enable them to perform lifting operations specific to their environment in accordance with local regulations and industry standards. It is ideally suited for operators lifting a variety of loads with different rigging configurations. Operators completing this program will gain the necessary knowledge and practical skills in preparation of writing the provincial overhead crane operators exam.

Content

- Regulations and standards
- Risk management
- Lifting plan
- Rigging fundamentals
- Overhead crane pre-use inspection
- Overhead crane safe operating principles
- Communications (radio and hand signals)
- Practical application of the equipment and principles

Format

The program is a combination of theory and practical training. A minimum of 50% of the time is dedicated to practical hands on experience. Students are evaluated by means of a written test and a practical evaluation. Upon successful completion of the program, a certificate will be issued.

Duration

5 days

Location

Training is delivered at the Hercules Training Academy or can also be delivered on-site.

Required PPE

CSA approved safety boots, safety glasses, hard hat
